

Coding & Solution

Date	15 March 2026
Team ID	xxxxxx
Project Name	Smart Lender
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	[Paste your GitHub / GitLab or hosted link here]
Programming Language(s)	Python , HTML , CSS , javascript
Framework(s) Used	Flask , Scikit-learn, pandas, numpy

Key Features Implemented	Loan eligibility prediction using Machine Learning • User-friendly web interface • Real-time prediction • Data preprocessing • Model evaluation • Secure input validation
Pending / Incomplete Features	User login & registration • Database integration • Cloud deployment • Email/SMS notifications • Admin dashboard
Setup / Run Instructions	1. Install Python 3.x 2. Install required libraries (pip install -r requirements.txt) 3. Run app.py 4. Open the localhost URL in a browser and test the application.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments: The Smart Lender project uses Machine Learning to predict loan eligibility based on applicant details. The application is built using Flask and follows clean coding practices with a modular structure for better readability and maintainability.
