

Project Initialization and Planning Phase

Date	05 July 2026
Team ID	TBD
Project Name	Smart Lender
Maximum Marks	

Define Problem Statements (Customer Problem Statement Template):

Many loan applicants face delays and uncertainty because traditional loan approval processes involve manual verification, lengthy paperwork, and inconsistent decision-making. Financial institutions also spend significant time evaluating applications, which increases operational costs and the risk of human error. Smart Lender aims to solve this problem by using AI and machine learning to automate loan eligibility prediction, enabling faster, more accurate, and fair loan approval decisions for both banks and customers.

Example:

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A customer looking for a loan.	Find and apply for the best loan with a simple process.	It is difficult to compare loan options and eligibility across different lenders.	Every lender has different interest rates, eligibility criteria, and application procedures.	Confused, frustrated, and unsure about choosing the right loan.
